Config Manager
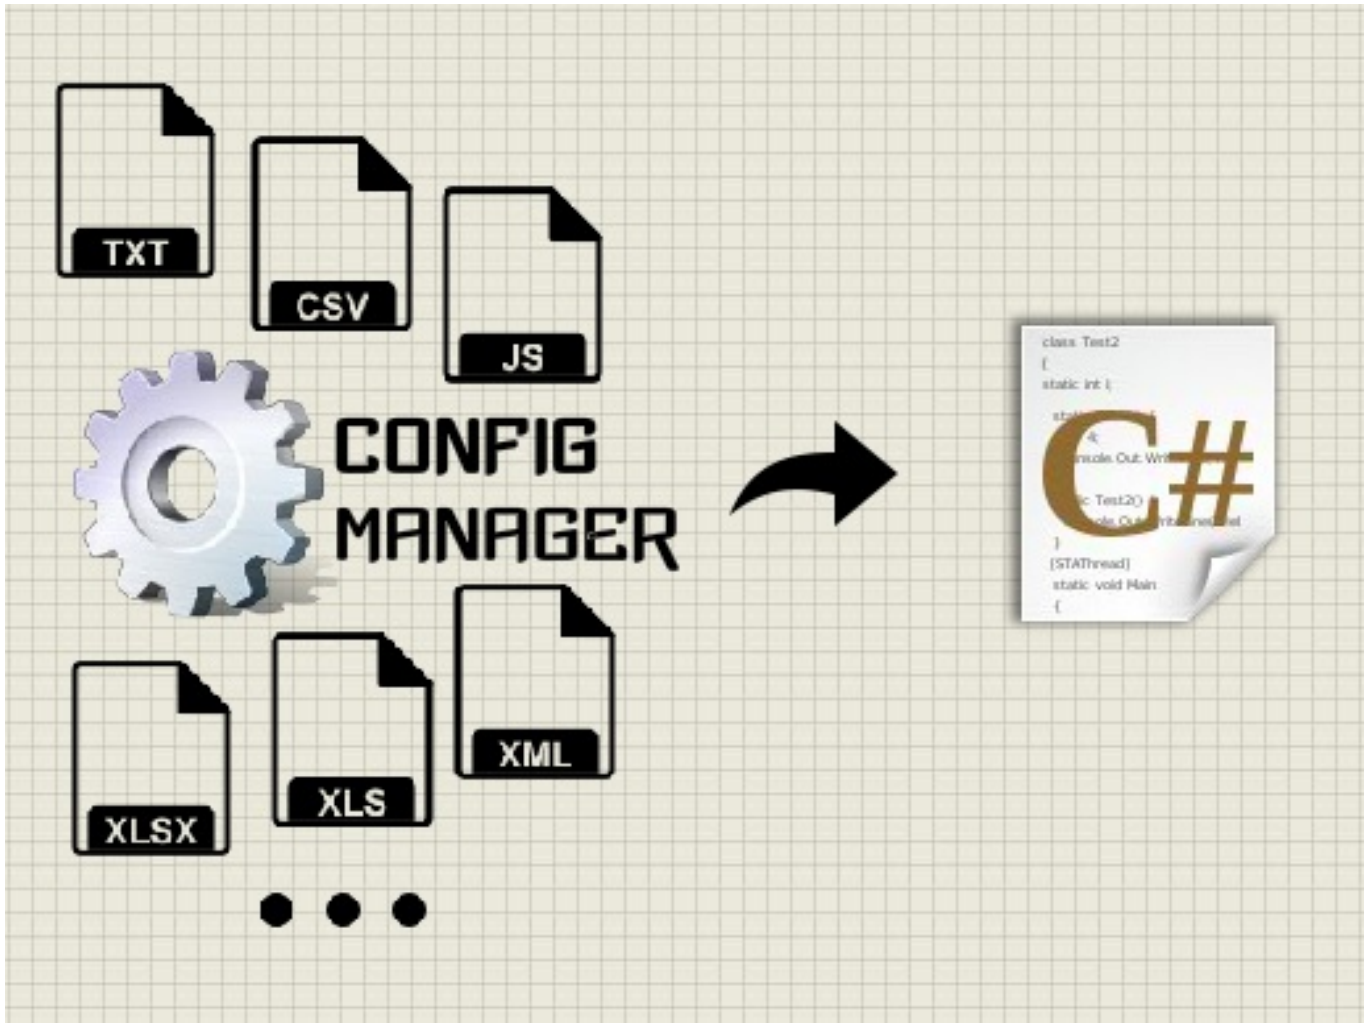

Fast & Easy Config Manage Tool

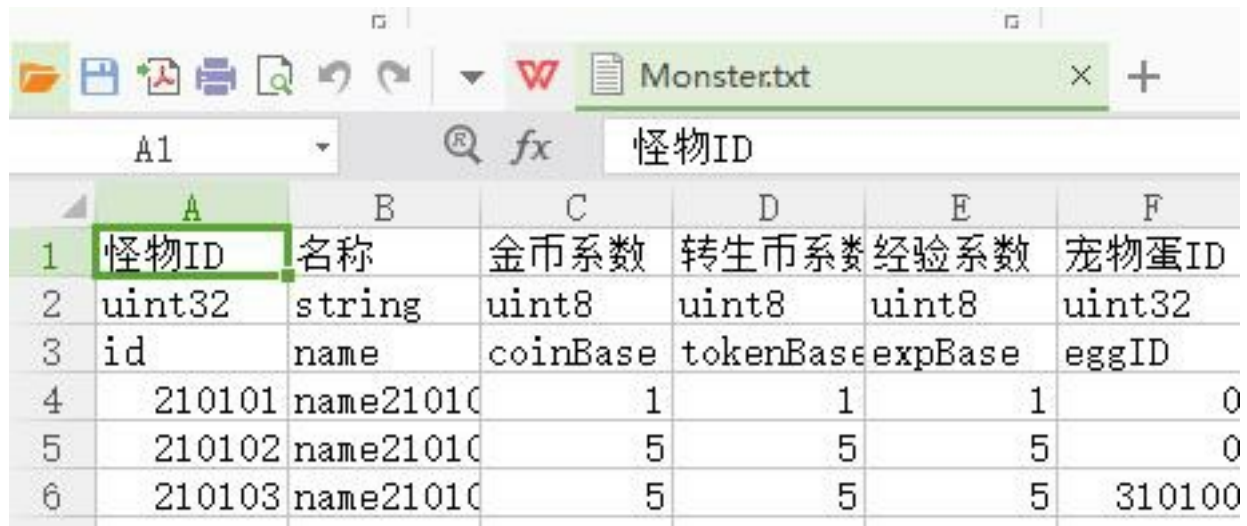

Features

1. **Fast Parse**: Parse in Editor

2. **Formats**: txt,csv,json,xml,xls,xlsx...

3. **No size**: all scripts in editor

4. **Intelligent**: Auto select type

5. **Reduce errors**: "."operation
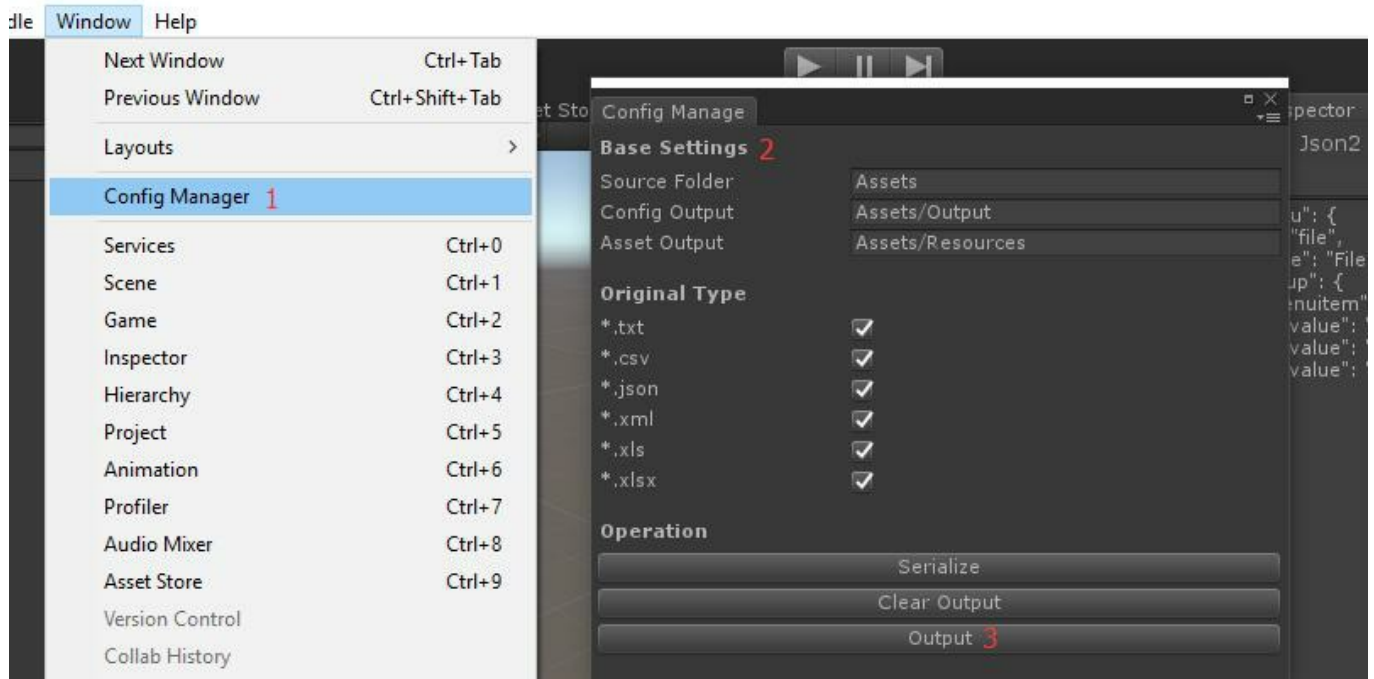

Quick Start

Edit Configs:

[Sheet](#)

[Json](#)

[Xml](#)

In Editor:

1. Press menu "Window/Config Manager";

2. Set paths;

3. Press "output"

In Runtime:

1. Call Deserialize();
2. Call Get() use them.

```
SerializableSet set = Resources.Load<SerializableSet>("Se
rializableSet");
Deserializer.Deserialize(set);

/*

AssetBundle bundle = AssetBundle.LoadFromFile(Application
.streamingAssetsPath + "/config.ab");
set = bundle.LoadAsset<SerializableSet>("SerializableSet"
);
Deserializer.Deserialize(set);
*/
```
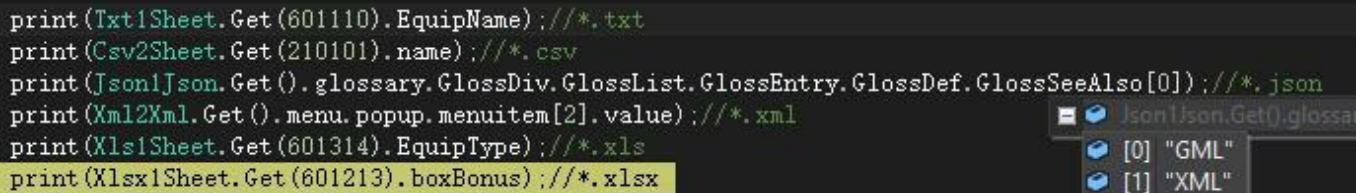

```
MonsterSheet monsterSheet = MonsterSheet.Get(210102)

print(monsterSheet.name);
```

```
print(Txt1Sheet.Get(601110).EquipName);//*.txt
print(Csv2Sheet.Get(210101).name);//*.csv
print(Json1Json.Get().glossary.GlossDiv.GlossList.GlossEntry.GlossDef.GlossSeeAlso[0]);//*.json
print(Xml2Xml.Get().menu.popup.menuitem[2].value);//*.xml
print(Xls1Sheet.Get(601314).EquipType);//*.xls
print(Xlsx1Sheet.Get(601213).boxBonus);//*.xlsx
```
```
                                    ■ ● Json1Json.Get().glossa
                                    ● [0] "GML"
                                    ● [1] "XML"
```
